Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Amendment received on 1/18/05 has been entered in this application.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Zhao et al (Pat. No. 6,756,938).

Zhao et al teach a computer readable medium, a communications system, and a method for estimating altitude of a communications device including the steps of providing a two-dimensional location estimate (col 3, lines 6-12) of the communications device, and estimating (col 2, lines 54+) the altitude of the communications device based at least on altitude of at least two antenna of a communications system, and on the two-dimensional location estimate (col 3, lines 6-12) of the communication device, the communications device communicating with the communications system via at least two antenna.

With regard to claims 22-27, and 43, Zhao et al teach a method for providing location assistance information including estimating (col 2, lines 54+) an altitude for the communications device based at least on altitude information of at least one antenna, and determining (fig. 2; fig. 4-5) location assistance information based on a two-
